PROFESSIONAL SUMMARY

IT Networking, Cloud Administration and cybersecurity professional student pursuing a Diploma in Information Technology Professional at Trios College, with hands-on experience monitoring security signals, triaging alerts, and documenting findings across Windows Server, Linux, and cloud environments. Practical exposure to SIEM monitoring (Wazuh, Security Onion), vulnerability assessment and penetration testing tooling, identity and access management (Active Directory, Group Policy), and cloud security across OCI and Azure. Strong analytical and documentation habits developed through lab-based incident investigation, security assessment reporting, and infrastructure troubleshooting. Currently pursuing CompTIA Security+ (expected 2026), with a high degree of integrity and discretion handling sensitive technical information.

CORE QUALIFICATIONS

Security Concepts & Frameworks: Security hardening, defense-in-depth principles, incident documentation, and response playbook support; familiarity with common attack techniques and mitigation strategies

SIEM & Monitoring: Wazuh SIEM monitoring; Security Onion deployment and SSH/firewall (so-allow) administration for network security monitoring

Endpoint & Identity Management: Windows Server, Active Directory, Group Policy administration; endpoint troubleshooting and hardening in Hyper-V/Proxmox lab environments

Vulnerability Management: Vulnerability assessment and penetration testing using OpenVAS/Nessus, Nikto, Gobuster, sqlmap, Hydra, Metasploit, BloodHound, CrackMapExec, and Hashcat against lab targets (Metasploitable 2, Kali Linux)

Cloud Security: Oracle Cloud Infrastructure (OCI) and Microsoft Azure account configuration, VM/database provisioning, and hybrid cloud architecture with on-prem Proxmox integration

Operating Systems: Windows Server, Windows 11, Linux (Ubuntu/Fedora); PowerShell and Bash scripting for automation and troubleshooting

Documentation & Reporting: Produced a comprehensive security assessment report covering vulnerability assessment and penetration testing findings across a lab network

Certifications In Progress: CompTIA Security+ (expected 2026); CompTIA A+ (expected 2026); Google Cybersecurity Certificate coursework

TECHNICAL SKILLS

Infrastructure & Networking: TCP/IP, VLANs, Routing & Switching, Cisco Networking, DNS, DHCP, VPN, SSH, Wireless Networking

Systems Administration: Windows Server, Windows 11, Linux (Ubuntu/Fedora), Active Directory, Group Policy

Cloud & Virtualization: Oracle Cloud Infrastructure (OCI), Microsoft Azure, Hyper-V, Proxmox, Docker, Kubernetes

Cybersecurity Tools: Wazuh, Security Onion, OpenVAS/Nessus, Metasploit, Hydra, sqlmap, Nikto, Gobuster, BloodHound, CrackMapExec, Hashcat, Kali Linux

Automation & Tools: PowerShell, Bash, Ansible, Git

Enterprise Services: Microsoft Exchange Server, Microsoft SQL Server, IIS, Apache, Nginx

TECHNICAL PROJECTS

- Built and maintain a hybrid cloud/on-prem home lab combining an OCI public cloud web server (Apache/Nginx on Ubuntu 24.04) with a private Proxmox VE host, gaining ongoing hands-on exposure to cloud and on-prem security signals beyond coursework.
- Deployed Security Onion for network security monitoring within the lab environment, including SSH connectivity via PuTTY and firewall whitelisting (so-allow) configuration.
- Conducted vulnerability assessments and penetration testing using Kali Linux against a lab network (192.168.100.0/24) with Metasploit, OpenVAS/Nessus, Hydra, sqlmap, Nikto, Gobuster, BloodHound, CrackMapExec, and Hashcat; documented findings in a comprehensive security assessment report.
- Investigated and resolved cascading Hyper-V incidents on a production-style server (orphaned VM registrations, VMs stuck in Saved-Critical state), performing root-cause analysis, data recovery via read-only VHDX mounting, and documenting remediation steps.
- Configured and managed Microsoft Exchange Server infrastructure including mailboxes, transport rules, retention policies, and Recovery Database (RDB) restoration planning.

- Deployed Windows Server and Active Directory environments, including domain controller promotion and Group Policy configuration, for enterprise infrastructure simulations.
- Designed and configured multi-VLAN Cisco network infrastructures to support segmented lab environments.
- Executed bulk VM export and backup procedures (PowerShell Export-VM) across nine virtual machines to support business continuity and disaster recovery practices.

PROFESSIONAL EXPERIENCE

COOP IT Specialist | Brand Media | July 2026 – November 2026

- Provided tier-1 technical support and troubleshooting for staff, resolving hardware, software, and connectivity issues to minimize downtime.
- Supported website and CMS operations alongside social media platform administration, assisting with content updates, publishing workflows, and platform maintenance.
- Managed and organized digital assets and media systems, ensuring accurate storage, version control, and accessibility across teams.
- Assisted with day-to-day network and systems administration tasks, including basic configuration, monitoring, and troubleshooting of connected devices.
- Collaborated with marketing and content teams to align technical support with brand media production needs and deadlines.

Industrial Electrician / PLC Programmer Intern | Magna International Oct 2024 – Dec 2024

- Assisted with industrial electrical systems maintenance and automation hardware support.
- Worked with PLC programming concepts including ladder logic and structured text.
- Supported troubleshooting of industrial control systems and industrial communication protocols, developing strong analytical and systematic problem-solving habits.
- Prepared clear technical documentation and maintenance reports.

Automotive Service Technician | Islington Chrysler Dodge Jeep Ram Fiat Jan 2022 – Oct 2023

- Performed diagnostics, maintenance, and repairs on hybrid, electric, and traditional vehicles.
- Utilized manufacturer diagnostic software and technical service tools, applying structured troubleshooting procedures.
- Delivered high-quality customer service and technical support in a fast-paced environment.

Automotive Service Technician Apprentice → Senior Apprentice | Avenue Nissan Oct 2018 – Nov 2021

- Assisted with vehicle maintenance and repair operations.
- Supported troubleshooting of electrical and electronic systems.
- Documented completed services and inspection findings with attention to accuracy and detail.

EDUCATION

Diploma in Information Technology Professional — Trios College | Expected Graduation: Nov 2026

Diploma in Industrial Electrician (Robotics with PLC Programs) — Stanford International College | Jan 2024 – Dec 2024

Diploma in Automotive Service Technician — Centennial College | Aug 2018 – May 2021

CERTIFICATIONS

- CompTIA A+ — In Progress (Expected 2026)
- CompTIA Security+ — In Progress (Expected 2026)

ADDITIONAL INFORMATION

- Eligible to work in Canada
- Strong interest in Security Operations, Cloud Computing, Cybersecurity, and Systems Administration
- Comfortable working independently and collaboratively in a remote environment
- Continuously learning emerging threats, tools, and enterprise IT/security solutions
